Johnson & Johnson

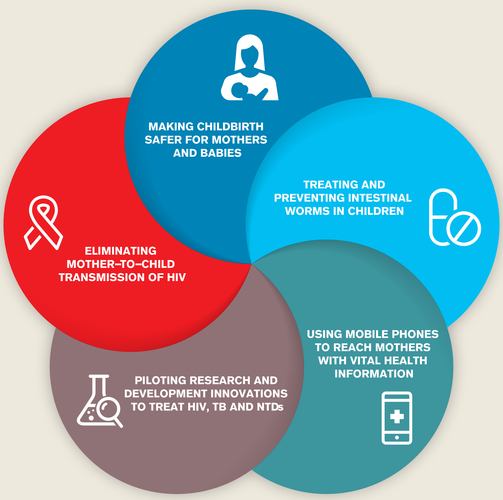
Our Commitment to Improving the Health of Women and Children

Strengthening health systems, training healthcare workers and preventing disease among the most vulnerable

In 2010, Johnson & Johnson pledged to support Millennium Development Goals (MDG) 4, 5 and 6 with a comprehensive, five-year commitment to reach as many as 120 million women and children a year by 2015. This pledge reflects a shared vision of a world in which women are healthy and children live to reach their full potential.

Our Commitments

As a global healthcare company, our commitment focuses on five areas where we have developed strong, innovative partnerships – and have the potential to foster the greatest improvements in maternal and child health:



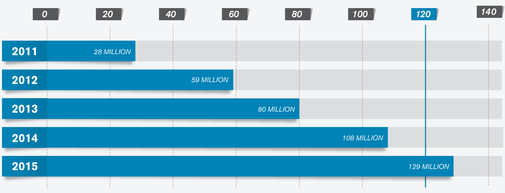
MAKING CHILDBIRTH SAFER FOR MOTHERS AND BABIES
TREATING AND PREVENTING INTESTINAL WORMS IN CHILDREN
ELIMINATING MOTHER–TO–CHILD TRANSMISSION OF HIV
USING MOBILE PHONES TO REACH MOTHERS WITH VITAL HEALTH INFORMATION
PILOTING RESEARCH AND DEVELOPMENT INNOVATIONS TO TREAT HIV, TB AND NTDs

Fulfilling Our Promise and Making a Difference

Measuring progress is an important element of our commitment to fulfilling our MDG pledge. We work with partners each year to count the women and children who have directly benefited from Johnson & Johnson-supported health programs, and hold ourselves accountable for areas in which gaps remain.

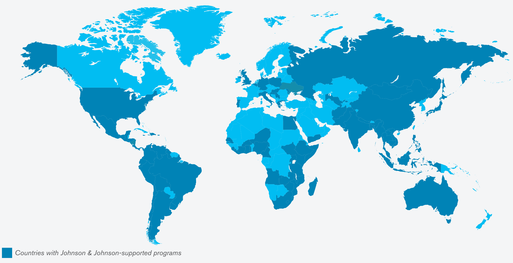
Women and children directly benefiting from Johnson & Johnson-supported programs and partnerships since 2010

Working with partners on the frontlines of care, Johnson & Johnson has fulfilled its MDG commitments, improving the lives of more than **400 million women and children** over the 5-year timeframe.



Countries with Johnson & Johnson-supported programs

Johnson & Johnson has worked with partners in **84 countries**, including most of the **MDG target countries**.



Countries with Johnson & Johnson-supported programs

Our Impact in Five MDG Focus Areas

Johnson & Johnson has supported training programs for more than **410,000 healthcare providers**, who have reached more than **16 million women and children** in resource-limited countries around the world, making childbirth safer for women and babies.

We have donated more than **480 million** doses of VERMOX® (mebendazole) in 20 countries since 2011. In 2014 alone, our VERMOX® donations enabled more than **110 million children** to receive treatments for intestinal worms.

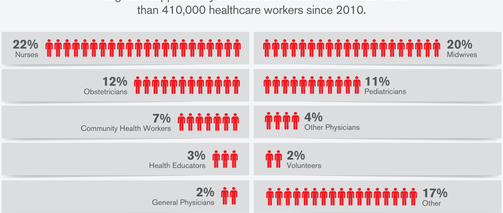
Through public-private partnerships, more than **3 million new and expecting moms** now receive stage-based vital health information through mobile phones, empowering them to make better health decisions for themselves and their babies. Globally adaptable messages developed by BabyCenter® and health experts are used by **66 organizations in 27 countries**.

Since 2010, we have worked within communities and health systems in **8 countries** on programs to help prevent mother-to-child transmission of HIV. This includes providing support and care to mothers and pregnant women to training health workers. To date, these programs have benefited more than **500,000 women and children**.

The Janssen Pharmaceutical Companies of Johnson & Johnson launched **Janssen Global Public Health** in early 2014 to unify our commitment to research, develop and deliver transformational medicines to address some of the world's most critical health problems including **Multi-Drug Resistant Tuberculosis**, **Neglected Tropical Diseases**, and **HIV**.

Trained Healthcare Workers — A Closer Look

Programs supported by Johnson & Johnson have trained more than 410,000 healthcare workers since 2010.



ALL DATA AS OF DECEMBER 2014

Building on a long legacy of our commitment to maternal and child health, Johnson & Johnson will continue its work to save and improve the lives of millions of women and children as we enter the next set of global goals.
